

Drone Training

Thursday, April 21
5pm-7pm
at Eastern's main campus in
Moorefield

Remote sensing continues to be the next level of technology to really impact our farming operation. Regardless if the imagery comes from satellite, aircraft, or an unmanned aerial system, it's important to keep up with this technology and learn what it can mean for you. This workshop will feature conversations about the latest technology in UAS.

TO ENROLL, CALL:
304-434-8000,
EXT. 9253

TOPICS INCLUDE:

- What we have learned in 2015: the good, bad, & ugly
- What about satellite options for 2016?
- FAA policy update on drone use
- Straight talk on drones; can you afford not to have one?
- What are your plans for 2016? What should you do?
- See the latest examples of the newest technology
- Q &A
