

# ANTI-STIGMA WORKSHOP

## Anti-Stigma Workshop

This Anti-Stigma workshop hosted by Eastern's Workforce Education Department will feature various presenters discussing the following topics:

**Stages of change:** understand how behavior change occurs and how to support people through the process by providing appropriate interventions for each stage.

**Adverse childhood experiences:** learn how to recognize the connection between substance use and trauma and how to build resilient, self-healing communities.

**Social determinants of health:** define social determinants of health and how they contribute to what substance use looks like for individuals and communities.

**MAT as overdose prevention:** learn about medications for opioid use disorder and how they improve lives and prevent overdose. Discuss the impact of stigma on access to these medications.

**Comprehensive health framework for people substance users:** learn how stigma impacts health and discuss harm reduction practices for infectious disease prevention. Consider all the other topics discussed and how to establish working services for people who use drugs within your organization.

**CEUs available for social workers, LPCs and addiction/prevention professionals.**
