<b>Prerequisite:</b> ENL 101 or ENL 117 <b>Corequisite:</b> None <b>Pre/Corequisite:</b>
<b>Grading Mode:</b> Letter
<b>Catalog Description:</b> This course is designed to acquaint the student with numerous ethical issues and perspectives confronting society and environmental scientists and their influence on the development of environmental policy and regulation. Existing and proposed policies and regulations are examined as to their ethical background.
<b>Course Outcomes:</b> 1. Describe the U.S. and state-level legislative, executive, and judicial framework and hierarchy under which environmental laws and regulations are created and administered. 2. Predict possible economic, political, societal, and environmental effects of existing and proposed environmental laws. 3. Outline the essential provisions of all the major environmental laws. 4. Locate and summarize the detailed Federal and state environmental regulations that apply to specific corporate, industrial, or client situations. 5. Monitor changes and developments in environmental laws and regulations applicable to specific corporate, industrial, or client situations.
<b>Implementation Cycle:</b> Spring
