

SOLAR INSTALLATION TECHNICIAN COURSE

SIX-WEEK HYBRID SOLAR INSTALLATION TECHNICIAN COURSE

Become certified as a Photovoltaic Installer–Level 1 (PVI1)

The Solar Installation Technician training program at Eastern West Virginia Community and Technical College trains students to become certified as a Photovoltaic Installer–Level 1 (PV1) through a six-week hybrid course instructed by Jay Warmke, co-owner of Blue Rock Station.

The course is designed to provide a solid foundation for those wishing to enter the industry, design and install their own residential solar system or simply understand how this emerging and important technology works. No prior experience or background in electrical systems and/or solar photovoltaics is needed.

Online Self-Paced Study

Upon registration, students will be given access to the 46-hour online course. This course is aligned with the provided textbook, Understanding Photovoltaics, and is organized into 11 chapters, with 11 review quizzes, 25 lab projects, over 500 narrated slides, dozens of integrated videos and resources. The instructor will be available to answer questions via email throughout the duration of the course.

COURSE FORMAT

Six weeks of online education with weekly one-hour webinar sessions start on Aug. 22. Followed by a two-day in-person session: Sept. 28 and 29. 8 - 5 p.m.

COST

Adults: \$400

High School Juniors and Seniors (16+): \$200
