

Protect WV Waterways

... as an AmeriCorps VISTA

WV Stream Partners VISTA Team members will work across the state with watershed associations to use the existing foundation of grants and mentors to increase organizational capacity and enhance environmental stewardship and community revitalization in WV. VISTA members will focus on projects that bring attention to a single watershed associations' work and spark tourism and economic development within the community. They will foster new partnerships to increase membership and financial support by creating unique and exciting projects that connect economic development to the stream or river.

For more information on the WV Stream Partners Program and our areas of work visit:
